DEMOCRACY DEFINED EDUCATIONAL INFORMATION SERIES EIS#23

RADIOACTIVITY FROM CROPS FED WITH ROCK PHOSPHATE 'FERTILISER' IS THE PRINCIPAL CAUSE OF CANCER.

An Essay by Kenn d'Oudney.

According to statistics, cancer is one of the most frequent causes of early mortality in the population. On reading the information provided herein, it is easy to understand why. That most cancers are caused by radioactivity in commercially-produced crops as a result of the misuse of rock phosphates as 'fertiliser' is indeed news to many people. Yet, information about radioactivity deriving from rock phosphates has circulated at the highest levels; viz. for example, the endorsers of our publication "THE REPORT" (New Updated and Expanded 2025 Edition ISBN 9781902848310). Clinical studies by world respected academics and research institutions establish that radioactive elements are introduced into crops by cultivators' practices.

It is a shock to learn that this knowledge of literally life-and-death significance is not merely ignored, but is to all intents premeditatedly buried by government and the corporately-owned and controlled mass media, and by state (mis)education. This essay is based on some of the information in Part One (of the seven parts) of THE REPORT, which may be referred to for full source attribution, further quoted material, and a large helpful bibliography. Endorsements of THE REPORT by academics, doctors and judges (U.S. & U.K.) are shown below.

Eventually, the U.S. Gov's Centers for Disease Control and EPA came to publish webpages confirming not only radioactivity in tobacco but also radioactivity in phosphate fertilisers on their 'radiation health' and 'radioactivity in tobacco' pages.

DISCOVERY

Radioactivity in tobacco was first established and researched by Edward Radford and Vilma Hunt at Harvard University, as long ago as 1964.¹ This is explained as follows. Plant-growth is stimulated by: nitrogen(N); potassium(K); and phosphorus(P) the latter comprising c. 20-45% of superphosphate fertiliser—***but, the rock phosphates mined and used to make this fertiliser also contain naturally-occurring but intensely radioactive elements in profusion.***

Smoking tobacco cultivated in soil 'fertilised', actually *poisoned*, for many decades with *phosphates containing uranium, along with radium, its decay products*, and tobacco's characteristic absorption patterns, are concluded to be the cause of lung and other cancers.

1 'Polonium-210: A Volatile Radioelement in Cigarettes,' Dept. of Physiology, Harvard, Science, 1964. (Ref. Bibliog in "THE REPORT.")

Metastasis (spreading) causes growth of tumours in other parts of the body. Tobacco in particular requires copious fertiliser because each crop leeches large amounts of nutrition from the ground. Tobacco plants' roots absorb naturally occurring radioactive elements in soil, as well as the radioactive phosphates misused as 'fertiliser'. Also, dangerous elements whipped into the air by breezes and farm equipment attach to the sticky resin tips of hairs growing on each tobacco leaf. ***In addition to uranium, tobacco absorbs the following radioactive elements from phosphates:***

<i>radium-226</i>	<i>radon-222</i>
<i>polonium-210</i>	<i>lead-210</i>

To maximise profits from commercial agriculture, crops such as vegetables, staple food cereals, tobacco, and pasture for animals, are intensely grown using phosphates. In addition to the phosphorus, plants absorb the radioactive elements through their roots.

Hydroponics: it is due principally to the fact that phosphates are used in liquid or soluble form (or are crushed and dissolved in water), that *plants* such as tomatoes, squash/courgettes, aubergines, etc., are viably grown — and contaminated — hydroponically, i.e. indoors, in water, with water-borne radioactive chemicals fed to the roots. This is perhaps the most efficient method of delivering radioactivity to a plant.

RADIATION AND DNA

Amongst the types of radiation, ionising *alpha radiation* is long-established as especially causative of cancer and leukæmia, and it afflicts people with great harm in numerous other ways.

RADIOACTIVITY IN FOOD

Human and animal bodies are made up of cells which replicate before ageing and dying off. DNA (molecular deoxyribonucleic acid) within the nucleus of cells is the genetic information ‘blueprint’ or ‘recipe’ from which cells replicate. Radiation represents a source of danger to humans and animals which they are not effectively equipped to resist.

Radioactivity interferes with DNA at the nuclear atomic and molecular level. When genetic information controlling cell replication is deformed, cells can over-replicate, grow into malignant tumours, and spread (metastasis).

Following the nuclear explosions at Hiroshima, Nagasaki and Chernobyl, the consequential disease of epidemic proportions in the nearby populations, was (and is) due principally to *alpha radiation*. The harm from radiation derived from phosphates, though not so easily understood and obvious as that which is associated with a nuclear explosion, can be nonetheless injurious and fatal. Scientists recognise the danger to living things from beta radiation emitted by lead-210, which has a radioactive half-life of 22.2 years. Alpha radiation can be twenty times more damaging.

Amongst others, Doctor Edward Martell, a radio-chemist of the U.S. National Center for Atmospheric Research, in his paper published in 1983 in Proceedings of the U.S. National Academy of Science, stated that, ***“It is proposed here that most bronchial cancers in smokers are induced by multiple α -particle [alpha radiation] interactions with basal and epithelial cells at bronchial bifurcations.”***

“Indoor radon progeny [radioactive decay elements such as polonium and lead] may be a factor in the etiology of some of the others—cancers of the larynx, pharynx, and esophagus in particular.”

Enough polonium-210 alpha radiation exists in tobacco for the polonium alone to be cause of the majority of lung cancer in tobacco smokers.

Radiation produces many other adverse conditions in the human, characterised by general ill-health and reduced immune-system efficiency; leukæmia; mental and physical handicaps and deformities; teratoma (congenital tumour); Siamese (conjoined) twins; teratogeny (production of infant mutant monsters); and birth defects. Infertility and teratogeny result from irradiation of DNA within sperm and ova. Unborn infants can receive pathogenic, leukæmogenic and carcinogenic doses of radioactivity via the mother’s bloodstream.

Note that radiation, particularly the sun’s ultraviolet light, is a cause of skin cancer.

RADIOACTIVE ‘FERTILISER’

Tobacco and other crops have been cultivated for many decades with the use of phosphates. Interestingly, the clinical evidence of official empirical* studies exonerates smoke-tar from carcinosis allegations and speculations. In addition to the polonium alone being responsible for causing “most” lung cancer, the evidence demonstrates radiation as principal cause to all carcinosis in humans. The death-rate from lung cancer is *the same* from the smoking of *low-tar* (‘lites’) as from *high-tar* cigarettes:¹ hence, not the various chemicals in vegetative smoke-tar but *radioactivity* is confirmed as cause of the cancers;² viz. UCLA School of Medicine Long-term Pulmonary Studies, 1969-1997; Donald P. Tashkin, M.D., Vol. 155, American Journal of Respiratory & Critical Care Medicine; U.S. National Institute of Health Study, Lancet, Sept., 1983, etc.

1 See: National Institutes of Health; National Cancer Institute.

2 Also see: ‘Radioactivity: The New-Found Danger in Cigarettes,’ Lowell Ponte, Reader’s Digest, March, 1986.

*Note: *empirical*, i.e. ‘hands-on’, actual use by human test subjects.

DEMOCRACY DEFINED ESSAY EIS23

Whereas the acutely addictive substance nicotine in tobacco can cause constriction of the pulmonary system (lungs) and Buerger's Disease (constriction of the vascular system, which can lead to gangrene and amputation of limbs), the smoke-tar itself is exonerated of carcinogens. It is not the plant's naturally-occurring smoke-tar chemicals, but *radiation* which is confirmed as the cause of cancers in tobacco smokers. Research by Beverly Cohen and Naomi Harley, of New York University Medical Center, established that *tobacco smokers who give up, have five years later almost as much lower lung radioactivity as do active tobacco smokers.*

Also see 2020 research 'The "Polonium In Vivo" Study: Polonium-210 in Bronchial Lavages of Patients with Suspected Lung Cancer,' by Vincenzo Zagà, M.D., et al.

Radioactive elements within *non-smokers* derive from food crops cultivated in soil poisoned by phosphates. Radio-isotopes are conveyed by the bloodstream to all parts of the body, accumulating in breasts, prostate and sex glands, liver, bone marrow, kidneys, lymph nodes, pancreas, and thyroid. 'Unaccountable' and much wrongly-attributed pathogeny results from radioactivity in our food.

Significantly, malignant tumours and cancer occur within the gastro-intestinal tract, accounting for a huge 26 per cent of diseased organ location.

While circulating in the bloodstream, the radiation is further indicated to cause cardio-vascular degeneration and associated disease, coronaries and stroke. Calcified blood plaques of sufferers of arteriosclerosis (hardened arteries) have been shown to contain polonium-210 and lead-210. The huge number of people who contract cancers, including those who never smoke, is explicated by the radioactive aspect of phosphates.

RADIOACTIVE 'ORGANIC' OR 'BIO' FOOD

Radioactive phosphates are used to boost crop growth in commercial food production worldwide, a big business the greater part of which is controlled by a minority of giant corporations.

Definition. Organic:

- (i) in Chemistry, the chemistry of carbon compounds;
- (ii) in horti- and agriculture, crops produced using fertilisers and pesticides *exclusively of carbonic plant or animal origin.*

Food sold as 'ORGANIC' or 'BIO' can be intensely radioactive: farmers using rock phosphates duplicitously define themselves and their produce as "organic" — because rock phosphates come from "naturally-occurring" rather than manufactured sources. In this way, commercial producers of food mislead their buying public into believing that their food is 'organically' produced. However, *genuine* organic fertilisers only derive from carbon-based sources; for example, guano, manure, hoof and horn, dried blood, soot, bonemeal, fishmeal, and woodash — ***not from rock phosphates.***

Farmers rely on phosphates and manure spread on the land to produce crops of pasture and animal feed, with the result that the feed, the subsequent 'manure' derived from the animals, the 'food', that is, the flesh of carcasses of cows, sheep, chickens, etc., and the milk, cheese and dairy products, can contain deadly radioactive carcinogens and pathogens.

RADIOACTIVITY IN FOOD

THE REPORT

THE REPORT (New Updated and Expanded 2025 Edition ISBN 978-1902848310) collates the Findings of Fact which establish that radioactivity in crops is caused by phosphates being misused as ‘fertiliser’. THE REPORT has circulated at the highest levels. Those in the ‘upper reaches’ of society know about these matters and take precautions to protect themselves. For example, to provide food for the household of the late multi-billionaire James Goldsmith, 80 *separate* acres were cultivated using only *organic* fertilisers.

Researching health issues is comprised of first-hand empirical clinical and laboratory techniques, results of which are then published as textbooks or recorded as academic and scientific papers. If people referred for their knowledge to the studies which explain how cancer can be caused by radioactivity in phosphates, such important information would not be “news” to them. It is literally a lethal mistake for people to believe most of what is carefully chosen money-motivated mendacity put out about cancer by the corporate-owned mass media.

In full knowledge of the radiation in phosphates, with complete impunity, corporations and owned subsidiaries import the phosphates, own and work the farmland, distribute, market and advertise the produce, and own the hyper- and supermarkets where it is sold. As a result of their motivation to maximise profits, it is a premeditated certainty that radioactivity is inserted into the bodies of the mass urban populations of humans, killing many, and causing grievous harm to innumerable others.

Cheap rock phosphates are spread every year onto the food-producing grasslands of Europe, the Steppes of Russia, the Prairies of America, and throughout Asia, Australia, Africa and South America. If the equivalent of only one-hundredth part of one per cent of the radioactivity spread every year onto the Prairies, escaped by accident from a nuclear facility, there would be a resounding hue and cry from the mass media, politicians and parties, and the pseudo-green groups. (Viz: the mishap at Three Mile Island nuclear power station.) There would also be severe incrimination of the culprits.

Yet, the money-motivated ruin by phosphates of *all* the world’s prime farmlands with many hundreds of thousands of consequential annual human mortalities, has the tacit consent of the press and pretentious corporate-funded ‘green’ and ‘conservation’ groups, and has been, and is, knowingly permitted and thus *abetted* by judicable* politicians.

**Definition.* judicable, that which may be tried by jury in a court of law.

PLUTOCRACY AND EARLY MORTALITY

As cancer is a widespread cause of early mortality in the population, the question must be asked as to *why* government and mass media do not report on these crucial matters truthfully? *Owners* of the implacable multi-national and national pharmaceutical manufacturers are financially linked with the central and other banks and finance houses, the oil and petro-chemical corporations, the armaments and auto industries, the alcohol and caffeinated beverage businesses, the tobacco cultivators and traders, and other manufacturing, agricultural, retail and service companies, newspapers, publishing, press, radio, television and advertising companies.

DEMOCRACY DEFINED ESSAY EIS23

The Owners' pharmaceutical (and other) companies now are huge, highly diversified conglomerates with heavily financed effective political lobbies controlling the deliberations of bureaucrats, and deciding for those politicians who comprise our Western 'governments'. The money-motivations of a ruthless, criminal owning-clique find expression in a de facto coup d'état: plutocracy* displaces democracy.

* *Definition.* plutocracy, government by the wealthiest members of society.

The pharmaceutical and 'health-care' companies operate within a crooked framework conspired to protect their Owners' hegemony and profits; the ill-gotten gains of a lawless, racketeering homicidal minority. The corrupt system is politically machinated by subservient self-seeking career politicians and the main parties in the financial interests of a behind-the-scenes, numerically miniscule fraction of the population. This is at the expense and to the destruction of the health, freedom and rights of all of the rest of the People.

The same persons who in effect poison your food also make an ongoing fortune (trillions) out of selling the chemotherapy and drugs to 'treat' men and women as they suffer an excruciating death. These corporations have a monumental vested interest in causing cancer throughout the world's population. Obviously, the Owners and their financial interests do not permit the spreading of *this* information by their mainstream outlets and their unconscionable servitors in politics and the judiciary.

In the absence of circulation of this information by government, state education and the media, all responsible citizens realise that it is for us, "We the People," to spread the knowledge in every way that we can. Ask yourself, if the public at large who are at present manipulated by misinformation, knew of these facts, what do you think they would do? Read more in THE REPORT.

See next page for –
U.S. Federal Mortality Statistics on Tobacco, Drugs, etc.

RADIOACTIVITY IN FOOD

COMPARISON OF CANNABIS TO OTHER SUBSTANCES BY OFFICIAL MORTALITY STATISTICS

- official stats collated into -

CANNABIS: THE FACTS, HUMAN RIGHTS AND THE LAW, THE REPORT
ISBN 9781902848310

U.S. federal government mortality statistics: NIH / CDC / DEA.

<u>SUBSTANCE</u>	<u>NUMBER OF DEATHS PER ANNUM:</u>
CANNABIS	0
TOBACCO	340,000 to 480,000
ALCOHOL (Not including 32% of all highway deaths and 35% of all murders).....	105,000+
ASPIRIN (Including deliberate overdose).....	180 to 1,000+
CAFFEINE (From stress, ulcers, triggering irregular heartbeats, etc.).....	1,000 to 10,000
DRUG OVERDOSE (Deliberate or accidental from legal, prescribed, illicit or patent medicines and/or mixing with alcohol — e.g. Fentanyl/Valium/Alcohol).....	108,000
PARACETAMOL (Acetaminophen, an available ‘over-the-counter’ pharmaceutical drug for moderate pain, colds, flu and fever).....	500+

Paracetamol is also responsible for 56,000 yearly Emergency Room admissions and is the most common cause of liver destruction or reason for transplant.

NOTA BENE:

The sample shown is unexceptional for in all the years since collation of figures was commenced by the U.S. government, cannabis has never been attributed as a cause of death, its use being incapable of inducing fatality¹ in humans and animals.

The 2022 National Survey on Drug Use and Health reported that 61.9 million people had used cannabis in the past year, with 42.3 million people reporting use in the last month.²

1 For OFFICIAL, QUALIFIED FINDINGS OF FACT on SAFETY, see information to follow in this Part, and subsequent Parts including the Judge’s Ruling in Part Four.

2 Such use is not a new phenomenon since the introduction of permitted ‘recreational use’ legislation in some States. For official confirmation of numbers of regular consumers, see p.120 in Part Four.

IMPORTANT NOTICE

RELEGALISATION, AMNESTY AND RESTITUTION

In South Africa, leader of the Dagga Party Jeremy Acton's defence presentation of our legal-medical textbook Cannabis: The Facts, Human Rights and the Law, THE REPORT (current ISBN 978-1902848310) obtained referral to the Constitutional Court leading to that Court's relegalisation of personal cultivation and possession of cannabis for private use. In the concurrent case of "*the dagga couple*," defendants Myrtle Clarke and Julian Stobbs presented THE REPORT stating that it forms the "*reasoning*" and "*basis for the legal challenge*" to prohibition legislation. Their charges of possession and dealing were dropped at Magistrate's Court pending outcome of the constitutional challenge—subsequently successful.

Thus it is seen how, when presented by defendants, THE REPORT can achieve dropped charges and relegalisation.

THE REPORT collates and presents in a formal context, exonerative clinical documentary evidence of the expert official empirical (human use) studies, exempting Cannabis Sativa from all criteria of legislative control ('prohibition').

Moreover, THE REPORT establishes that the apocryphal 'law' is perjurious, itself results from venal ulterior motive, and is gravely damaging to individual and society. (See Synopsis which follows.) This obliges administrations everywhere to pass a simple legislative Amendment returning cannabis to its legal status before the introduction of legislative controls.

– See **REVIEWS AND ENDORSEMENTS** on next page. –

– REVIEWS AND ENDORSEMENTS –

“You have done a splendid job of producing a comprehensive summary of the evidence documenting that the prohibition of the production, sale and use of cannabis is utterly unjustified and produces many harmful effects. Any impartial person reading your REPORT will almost certainly end up favouring the relegalisation of cannabis.”

NOBEL LAUREATE PROFESSOR MILTON FRIEDMAN, Economics’ Adviser to U.S. government (Reagan Administration); Author, video and TV series writer and presenter; Senior Research Fellow, Hoover Institution on War, Revolution and Peace; Professor Emeritus, University of Chicago.

“You represent a worthy part of the fight in many countries for the logical and beneficial use of cannabis. I thank you for that.”

PROFESSOR PATRICK D. WALL, M.D., Author; Professor of Physiology, UMDS St. Thomas’s (Teaching) Hospital, London; Fellow of the Royal Society; DM, FRCP.

“You are to be congratulated on a work well done. Very readable. It is an important REPORT and I do hope it will be widely distributed and read.”

PROFESSOR LESTER GRINSPOON, MD, Author on Drugs Policy, Professor of Psychiatry, Harvard University School of Medicine, Fellow of the American Association for the Advancement of Science and the American Psychiatric Association.

“The sections dealing with the rights and responsibilities of the jury are eloquent in their defence of fundamental individual rights. The authors correctly perceive the bedrock importance of trial by jury, and the significance of the jury’s right to judge the law itself. I welcome the addition of this REPORT to the world’s store of important writings on the subject of human liberty.”

DON DOIG, BSc., Author; U.S. National Coordinator, Co-founder, Fully Informed Jury Association (FIJA) / American Jury Institute.

“I did enjoy reading it. THE REPORT should contribute much.”

THE HON. JONATHON PORRITT, Bt., former Adviser to U.K. government on Environment; Author; Founder, Friends of the Earth; TV series writer and presenter.

“I have just finished reading your and Joanna’s book on Cannabis. It is a masterpiece on both drug prohibition and jury rights. Thanks to both of you for writing it.”

PROFESSOR JULIAN HEICKLEN, Jury Rights Activist; Coordinator, Tyranny Fighters Campaign.

“I am totally amazed at THE REPORT’s quality and overall goodness.”

DR. ANNE BIEZANEK, Authoress; ChB, BSc, MB, MFHom.

“A fine document.”

U.S. JUDGE’s letter to Authors.

“THE REPORT’s thesis is sound.”

U.K. JUDGE’s letter to Authors.

A book of THE RESTORATION QUADRIOLOGY

Synopsis on next page

SO YOU THINK CANNABIS PROHIBITION HAS NO EFFECT UPON YOU ?

THE REPORT provides unique content not to be found in any other author's work and gives in-depth analysis of, and an authoritative insight into, the multiple modern and traditional uses of Cannabis as superior resource to myriad products. It is comprised of Seven Parts, each examining different aspects of this far-reaching subject.

EXONERATIVE FINDINGS OF FACT; Official Empirical Research: THE REPORT collates the medico-scientific Findings of Fact and Conclusions of the government-funded clinical studies conducted by world-respected research and academic institutions into non-toxic, non-addictive natural herb cannabis (differentiated from pharmaceutical *laboratory* toxic product THC). The investigations' empirical evidence exonerates cannabis from all allegations of 'harm' and 'impairment' (including tests on simulated driving) *exempting cannabis from all legislative criteria of control ('prohibition')*. All citizens persecuted thereunder are due Amnesty and Restitution (as for other Wrongful Penalisation).

SIX PARTS (chapters) include expert documentary, legal, academic, scientific, technical, medical, economic, industrial, social, criminological, philosophical evidence, and that which is based on grounds of Equity, vindicating all private cultivation, trade, possession and use, and which further exposes perjury and venality behind prohibition 'legislation', *all acts of enforcement constituting crime per se*.

PART SEVEN, RESTORATION: JUSTICE AND THE CONSTITUTION, exposes corruption, ineptitude and injustice in the justice process; examines Law: natural law, supreme secular *legem terræ* Constitutional common law, treaties, statutes; quotes presidents, judges, lawyers and chief justices.

THE REPORT is regularly presented pre-trial by defendants to courts (judges) who forbid all Findings of Fact, evidence and defences which "*dispute the legality of the law*" before the jury. The official expert evidence in THE REPORT establishes the illegal nature of the legislation. THE REPORT quotes legal grounds (national and international) which demonstrate numerous infractions of laws by the prohibition legislation, and which show all acts of its enforcement to be crime per se. All citizens persecuted thereunder are due Amnesty and Restitution (as for other Wrongful Penalisation).

THE REPORT demonstrates in the law: injustice, inequity, invalidity, adverse effects, venal ulterior motive, perjury, fallacious derogation, and the *inherent* illegality of law which creates the Black Market and engenders all associated crime. The outcomes of this procedure of presenting THE REPORT as documentary evidence to the judge (court) have proved beneficial in the extreme for defendants.

*Courts require documentary evidence presented as the published textbook (not copies or e-book).

FRONT COVER

New 2025 Edition. With Addendum. Contains extensive Bibliography of authoritative source books and documents on Constitution, law and history. With Index. ISBN 978-1902848327 Softback, 328 large-size (A4) pages.

BACK COVER

DEMOCRACY DEFINED:

The Manifesto

Kenn d'Oudney focuses on Democracy. The word 'democracy' is widely abused and 'defined' incorrectly. This extensively researched book explains how components of constitutional democracy have been suppressed by malefic statist interventions to produce the modern decline and the Illegality of the Status Quo.

The Manifesto shows how the ideal society is to be achieved.

- HERE ARE SOME REVIEWS OF THE ESSAYS UPON WHICH THIS BOOK IS BASED -

"I think it is certainly true that Keynesian economics, as put into practice, has handed the economic power of the West to a few men who now almost totally control it. Likewise, I agree that the trial by jury is an essential bulwark of democracy and justice against a bankers' tyranny. I congratulate you on disseminating the above points."

His Hon. Patrick S.J. Carmack, Esq. Producer of The Money Masters video documentary.

"Thank you for your excellent work on Magna Carta. What a masterly exposition."

Major John Gouriet, Chairman, Defenders of the Realm; Battle for Britain Campaign supported by H.G. the Duke of Wellington; Edward Fox, OBE, and Frederick Forsyth, CBE.

"What a magnificent article! I intend to incorporate parts of it into speeches and writings."

Professor Julian Heicklen, Jury Rights Activist; U.S. National Coordinator, Tyranny Fighters.

"Superb. Should be read in every law school."

John Walsh, Esq., Barrister-at-Law, Author; Constitutional lawyer (U.S. & Australia).

[DEMOCRACY DEFINED: The Manifesto](#) ISBN 978-1902848327

A Treatise for the Democracy Defined Restoration Campaign by Kenn d'Oudney.

New 2025 Edition. Addendum, extensive Bibliography and Index.

Softback, 328 large-size (A4) pages.

The word 'democracy' is widely abused and 'defined' incorrectly. This extensively researched book explains how components of Constitutional Democracy have been suppressed by malefic statist interventions to produce the modern decline and the Illegality of the Status Quo. It sheds light on how democracy involves a variety of far-reaching issues, including political assassinations; the Ætiology of

unjustified Anti-Semitism; fraudulent fractional reserve lending banking practices; and the national issuance of interest-free currency and credit.

The historical, legal and constitutional facts and quotations in this book establish the perennially subject and liable status of executive, legislature and judiciary to universal, timeless secular moral and legal tenets of Equity, and to cost-free private prosecutions at Constitutional Common Law Trial by Jury (Article Sixty-One). Exposes the fallacies of "constitutional" statutes, groups and individuals. Indispensable reading for anyone who wishes to uphold the West's endangered, cherished heritage of Liberty and Equal Justice.

DEMOCRACY DEFINED: *The Manifesto* reveals the theoretical and practical framework upon which the ideal human society is to be achieved: the best of all possible worlds.

- MORE REVIEWS -

“Your book is an absolute triumph! I now understand why the term ‘Lawful Rebellion’ grates with you. I genuinely believe that your book should be compulsory reading for every one of our elected representatives... not to mention our own supporters! So well done! Excellent book and a great source of reference.”

JUSTIN WALKER, Campaign Coordinator, British Constitution Group. Amazon reviewer.

“I bought a copy of your excellent book from Amazon and I am impressed by both size and content. Frankly I haven't been able to put it down. Every home should have one and not just every law school but every secondary school should have one in its curriculum. I particularly enjoyed the 'Traitors to the People' chapter. The whole book is a fascinating read, well done.”

JOHN S., Swindon. (E-mail to DD.)

“I am SO pleased that I've read this compelling book and that I now understand the true meaning of “Democracy.” Although it's certainly not a novel, I found it as gripping as one. I had trouble putting it down. DEMOCRACY DEFINED: The Manifesto has opened my awareness dramatically.”

CAL BUCK, West Bromwich, Amazon reviewer.

“The Handbook for every person on the planet explaining True Law and Democracy.”

KENNETH JOHNS, Amazon reviewer.

“Excellent and well-written book on how the people in the so-called free world are not free. This is the missing education they should be teaching our children in school so they become enlightened on what's really going on in this world.”

ROBERT JOHN MONTAGUE, Amazon reviewer.

“This is a MUST READ (probably the ONLY read you'll need!) on democracy, Magna Carta, and Common Law. As I've made my way through it I discovered how much I didn't know — and that drove me on. It is thorough and deep, but worth reading all 300 large pages slowly, word by word. Just reading it is changing me — and giving me increased courage to speak out when necessary. One of the books I had no hesitation in giving a 5-star rating. It was worth every penny of the (gulp!) £18.00. Yep. Every penny.”

ANDREW SERCOMBE, Amazon reviewer.

“A MUST READ. Enough is enough of all this treasonous outlawry. I cannot express enough the importance of everyone reading this book, this is the 2nd copy I'm purchasing. Thank you Mr. d'Oudney for collating meticulously all these historical evidential facts in one book.”

DANTES DINIZ, Amazon reviewer.

By going to Amazon on the link and clicking on ‘Look Inside’, you can check out the four Synoptical Reference Pages of Contents to see subject matter; and get a glimpse of the text.
